DETAILED ACTION

Receipt is acknowledged of the amendment filed 04/25/2008.

The rejection under 35 USC 112, first paragraph is withdrawn in view of applicant's amendment to the specification.

The following rejection and observations were found after a patentability review:

Priority

Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 119(e) as follows:

The original specification and claims do not support the new limitation of "mesoporous".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 180-185 are rejected under 35 U.S.C. 102(b) as being anticipated by Canham (1st Annual International IEEE-EMBS Special Topic Conference on Microtechnologies in Medicine and Biology, October 12-14, 2000, Lyon France).

Canham discloses a biodegradable mesoporous drug delivery system having porosity between 1 and 95% (See Abstract; II. Porosification of Silicon, page 109, col. 2). Delivery may be up to several years (page 111, column 2, last paragraph). Mesoporous is defined as a pore width of between 2-50 nm (Porosification of Silicon, page 109, col. 2). The instant claims are clearly anticipated by Canham.

Claims 186-189 are objected to as dependent upon a rejected base claim.
